## **Mosquito Spraying**

The Town Council has chosen to proactively spray this year on a monthly basis to curb the amount of mosquitoes in the area. The upcoming spray schedule will be as follows: **July 28th & August 25th at 9:30 p.m.**

The treatment will take approximately 2 hours and will be applied throughout the Town. It is recommended that residents stay inside during this time frame.

## **Mosquito Trapping**

In cooperation with Tarrant County Health Department, Town staff has been setting mosquito traps since the first week in April. Tarrant County has tested a total of 28 West Nile Virus positive mosquito samples, one of which came from Pantego. No human cases have been reported at this time.

## **Mosquito Control**

The most important and effective form of mosquito/West Nile Virus control is to take a personal stake in the process. To prevent the breeding of mosquitoes, ensure that the areas on your property have no standing water. Check your buckets, flower pots, trash containers, or other likely collection areas and dump them out on a regular basis. When going outside, especially from dusk to dawn, wear clothes that cover as much of your skin as possible and use insect repellent.

**Mosquito dunks (one package per resident) are available at Town Hall to treat standing/stagnant water that cannot be emptied (i.e. ponds, fountains, etc.)**
